LilyPond code, compilable through ordinary LaTeX

This is a normal paragraph which is followed by a music example. If I compile the document with LaTeX, I get:

LilyPond example, to be processed with lilypond-book:

```
music = \relative e'' {
  e16 gis fis e dis cis | %1
  h4 r8 | %2
  e16 gis fis e dis cis | %3
  h4 r8 | %4
}
```

To get the music example I have to process this via `lilypond-book`.
